

Available authorizations

Scopes are used to grant an application different levels of access to data on behalf of the end user. Each API may declare one or more scopes.

API requires the following scopes. Select which ones you want to grant to Swagger UI.

oauth2 (OAuth2, implicit)

OAuth2 Implicit Grant

Authorized

Authorization URL: <https://login.microsoftonline.com/common/oauth2/authorize>

Flow: implicit

client_id: *****

Logout

```
\"value\": \"string\" } ] ] ]\"
```

Request URL

```
https://venuestwinsproject.eastus.azuremartspaces.net/management/api/v1.0/spaces
```

Server response

SpaceCreate {
  description: Space create model
  name*      string
             maxLength: 64
             minLength: 1
  description string
             maxLength: 4000
             minLength: 0
  friendlyName string
             maxLength: 64
             minLength: 0
             Optional friendly name
  type string
             Primary space type. Defaults to None if not specified
  typeId integer($int32)
             Type identifier. Cannot specify both Type and TypeId
  parentSpaceId string($uuid)
             example: 00000000-0000-0000-0000-000000000000
             The space's parent space
  subtype string
             Space subtype. Defaults to None if not specified
  subtypeId integer($int32)
             Subtype identifier. Cannot specify both Subtype and SubtypeId
  location Location > {...}
  timeZoneId integer($int32)
             Optional time zone identifier for the space
  status string
             Optional status. Defaults to None if not specified
  statusId integer($int32)
             Status identifier. Cannot specify both Status and StatusId
  properties > [...]
  timeZoneName string
             Optional time zone name. Cannot specify both TimeZoneId and TimeZoneName.
  children > [...]
  users > [...]
}
